EAR WRAPS

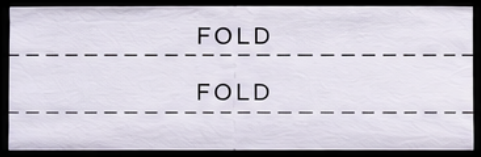
Step-by-Step Instructions

MATERIALS NEEDED:

Interfolded deli food wrap paper

Brand – James River Corp.
Food Wrap Products
Parchment, MI 49004

500 Sheets 12 in x 10¾ in



Fold paper in half lengthwise, then in half again.

Finished folded paper strip
(½ the original width, folded again).

FINAL WRAP

Folded ear wrap

Folded again

Secure with two rubber bands.

1 Take a folded paper strip and place it against the ear, with the top edge just below the end of the ear leather. The folded end will be at the top and the open ends at the bottom.

2 Position the paper strip so it is just below the end of the ear, with the folded end at the top.

3 Wrap the paper around the ear, keeping the hair flat and smooth. The wrap should be secure but not tight.

4 This is what the wrapped ear should look like.

5 Fold the wrapped ear up in half.

6 Fold up in half again and secure with two soft rubber bands. Check the wraps periodically and replace them as needed.

EAR WRAPS

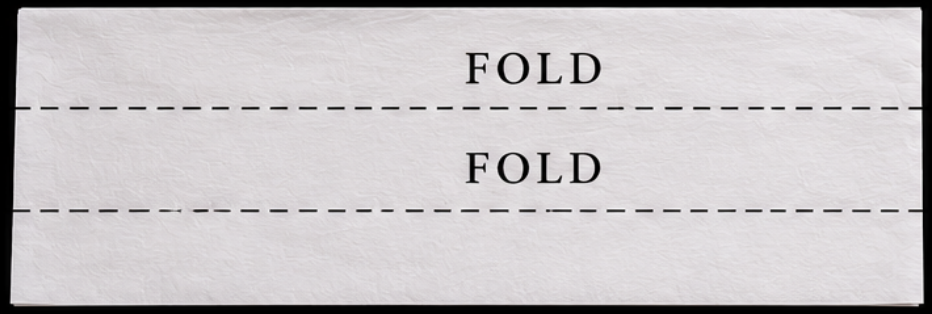
THE PAPER

INTERFOLDED DELI FOOD WRAP PAPER

Brand: James River
Food Wrap Products
Parchment, MI 49004

500 Sheets 12 in x 10 ¾ in

WRAP AFTER BATH — UNWRAP & COMB OUT AT LEAST ONCE A WEEK



Fold the paper in half lengthwise, then fold it in half again to create the finished ear-wrap strip.

This is the paper used in the SummerWinds ear-wrap method.

EAR WRAPS

Original SummerWinds Diagrams — Steps 1 Through 10

1

Hold the dog's ear and slide the folded paper under the ear. Keep the ear leather above the paper.

2

Bring one fourth of the paper in front of the ear and hold the ear coat securely.

3

Fold the remaining fourth around the front of the ear while continuing to hold the ear.

4

Fold the ear wrap in half while holding the dog's ear and the top of the wrap.

5

Fold the wrap in half again.

6

Hold the package so the rubber bands can be applied. First check that no ear leather is caught in the wrap.

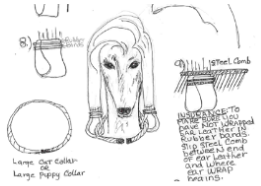
7

Check with a long-toothed steel comb before securing the rubber bands.

8

Use two rubber bands. Check again to be sure the ear leather is not caught.

9



A small, loose collar can be run through the ear wraps to keep them close to the neck and help prevent them from catching on objects.

10

REMOVING THE EAR WRAPS

The length of time you leave the ears wrapped will vary. When removing the wraps, check the hair around the top of the ear for loose hair that may have gathered around the wrap. Gently pull it apart and brush it out. Then comb through the ear with a steel comb. The wrap should remove easily.
